Deal Overview

Customer Overview

- VLI holds smallest Wabtec's IB & market share in Brazil (124# locos premium fleet @ 40%). VLI has been alternating orders from PR and Wabtec
- **VLI is finalizing its budget approval** to proceed to market and expects to issue the formal **RFP for 25 locos** in April. I'm initiating the proposal process now to **drive early discussions with VLI** and explore **bringing part of this volume into our 4Q'27 production schedule**
- Locos to support volume growth expected for 2028. Harvest starting on 1Q'28... **delivery date will be a differentiation against PR.**
- The renewal proposal accepted by the Ministry of Transport and is currently under technical review by ANTT and TCU for final approval. Signature expected in Aug'26

Product Offering

- ES43BBi locomotive requisition, Brazilian built units with kits from US
- Follow-on order from VLI's last batch from 2026 with new customer optional features required and obsolescences addressing

Color Code

Changes from baseline (2026 units 84X276173LA)

Cabs

- ES43BBi cabs
- CBL signaling system provision, Windshiled rock protection
- LED's to indicate parking brake status
- Auxiliary convenience inverter
- No protection grids on front door
- Operator rear door with D9-40BBW style lockable handles
- No doors tape rails and WITH helper armrest
- LXA integration
- Foot Rest
- **I-ETMS PTC equipment packaging**
- **New MEI HVAC nose cab mounted***

Aux Cab

- ES43BBi aux cab
- 8 axle inverter stack & bus bar
- DB intake screen
- Parking Brake LED feedback

Power Plant

- GEVO12 engine
- 5GMG210 alternator
- ES43BBi engine supp systems
- **Biofuel Kit**

Rad Cab / Cooling

- ES43BBi design
- 5GYA30 rad fan
- BHE lube oil cooler
- EAB with 26L schedule
- **Expansion tank pressure cap cover protection**

Digital

- LXA instead of DP locotrol std
- GoLINC
- EOA
- **LDRSV ER equipment***
- **I-ETMS PTC equipment**

Train Control

- No "ATC Signal" in E-IPM input 2
- LXA instead of DP locotrol std
- T/L Reset for Ground fault
- **LDRSV Event integration**
- **I-ETMS PTC Integration**

Systems

- 4,500 GHP
- CTE 57,838 kgf, PBE 41,481 kgf
- Meter gauge track
- Non emissions
- 196 metric tonnes nominal weight
- 73m curve negotiation
- 35C @ 1,200m site conditions
- 65 KPH max speed
- Portuguese primary language
- **XCA control system***

Trucks

- ES43BBi bogies
- Regular span bolster
- 8 powered axles
- GEB37 AC traction motor
- 42 in wheels
- Advanced rail cleaner
- Slack Adjuster: Automatic

Platform

- ES43BBi platform
- Two main sill beams w/ top & bottom plates
- 14,400L fuel tank
- Type F couplers, NC-390 draft gear
- 750 mm coupler height
- VLI end plate configuration
- Positive platform steps
- A2VF system for Fuel Fill monitoring
- No end hose protection nor coupler stop
- **Below deck cable and conduit anti-theft protections**

EQV & Comp Air

- ES43BBi design
- 5GDY131 & 5GDY91 TM blowers
- 5GDY89 alt blower, 5GDY97 exh blower
- Wabco 3CWD compressor
- Cut out cock with removable handle
- Regular Horn (no pressure regulator)

Service Offering...

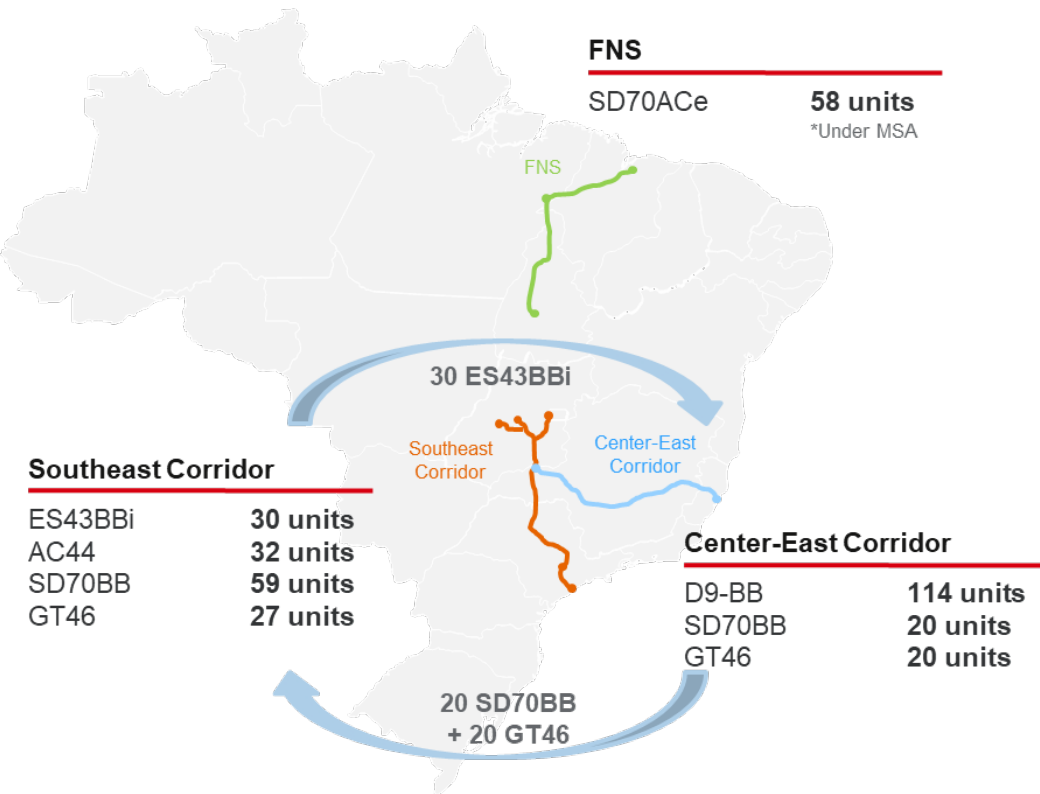

- Warranty 5 yrs
 - EOA/IPA 5 yrs
 - Training ES43BBI Required
 - Parts Credit \$100k/loco
 - TSA 2 yrs
-
- TSA Resources
- 7 TA's
 - Covering two shifts/day
 - 5 days/week
 - 1 car

Competition

Competitive Landscape

- VLI evaluating a possible fleet standardization by corridor

ES43BBi

VS

SD70BB

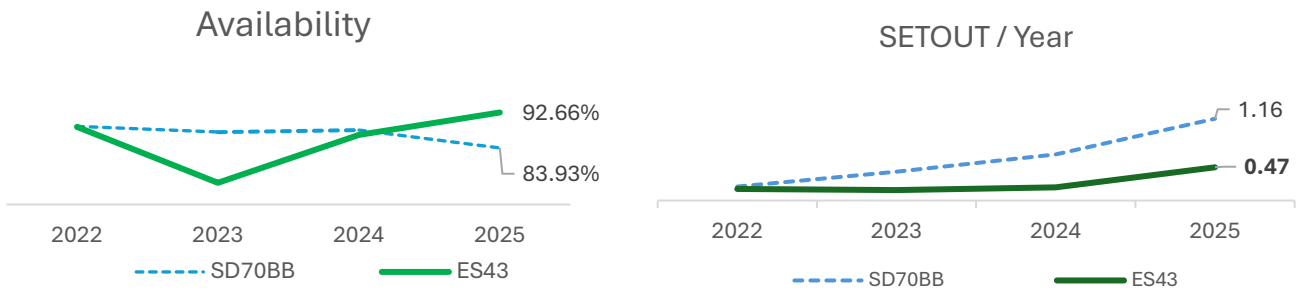

30 units

- Southeast Corridor – 30 units
- Center-East Corridor – 0 units

79 units

- Southeast Corridor – 59 units
- Center-East Corridor – 20 units

Fleet Performance

General Aspects

- PR batch of 8 units delivered in 2025 was limited to a rate of 2 units/month and faced several quality issues.
- The GT46 fleet has shown very low utilization following VLI's loss of the bauxite contract in 2024, and PR is now considering a **potential trade-in as part of the current 25-unit opportunity**.
- Wabtec has ~6% fuel advantage vs. SD70BB.
- VLI has alternated between us and PR in recent locomotive procurements:
 - ✓ **2023:** WABTEC won 12 units
 - ✓ **1H'24:** PR won 8 units
 - ✓ **2H'24:** WABTEC won 7 units
 - **1H'26:** ??? **VLI will likely split the order between Wabtec and PR.**

Capture as much volume as possible by value selling fuel, availability, and leveraging delivery timing

Product Offering

- ES43BBi locomotive requisition, Brazilian built units with kits from US
- Follow-on order from VLI's last batch to be delivered on 1Q'26
- VLI Loco list **84X276173LA**
- VLI Product Description **84A243116 revision A** from August 2023

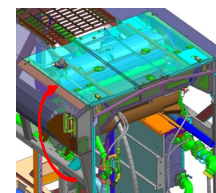

Evaluate additional NRE/ACO cost and its execution schedule for below changes on a VLI ES43BBi, considering 2025/2026 units (84X276173LA) as baseline:

1 - Include PTC onboard system installation from factory and integrated on locomotive design. Baseline units already considers provisions for system installation which is executed by the customer during commissioning.

2 - Addition of Vandal-proof protections covers to locomotive below deck cables and conduits. Use existing VLI design (customer installed) and ES58ACi (84D742768G1) as references. See details below of VLI design on "Vandal-Proof Protection"

3 - Addition of a system that blocks the opening of the expansion tank when pressurized. System should consist of a protection box (baseline 84C606871P1), that covers the pressure cap, and a vent valve with a flag (baseline 41A218022P2), which requires the maintenance person to open it when removing the protective cover. For its application on BBi water expansion tank type, it will be required to move the vent valve to above water tank (now it's on rad cab "fill panel") in order to it's flags.

4- Upgrade the engine to operate on B25 biofuel, including installation of the biodiesel kit in the diesel engine.
